

Thank you for the opportunity to share my support for
Bill #5283

which secures equal funding for agriculture education.

My son is a senior at Suffield High School, he has been in the agriscience program for the last 4 years. He has grown his knowledge in tremendous ways. From his love of aqua culture, and his role with leadership. Funding is critical so others may continue to experience the wonderful education this program brings. As well as keeping the importance of the agriscience program to our state.

Thank you,
Sara Tyburski
